

Stage dimensions:

at least 3 meters wide, 3 meters deep, 0.6 meters high.

Lighting:

2 white headlights, each with 1000 watts, over the entire stage.

Sound engineering:

- 2 phantom condenser microphones for instruments, e.g. AKG k 391 on a tall boom stand.
- 1 micro for guitar amps, e.g. shure sm 57
- 1 micro for vocal, e.g. shure sm 58

The mixing console should have a reverb effect.

For the sound system, we need a technician who checks the sound system and who cares during the show.

We also need a socket of 220 volt in the middle of the stage.
